

SAP S/4HANA Cloud 1811 Show & Tell – Cross Topic

Follow up on open questions

Submitted Questions	Answers provided by S4HC PM
Q) is present in SCPI a standard flow of replication of cost center in the other direction from S4cloud to ECC?	A) A replication in the other direction is basically possible but requires some level of changes to be done in the integration content.
Q) what is the minimum system/support Level if we want to connect an ECC system in 2tier mode?	A) There is no restriction as such with respect to the SAP ECC EhP versions.
Q) A new feature of Migration Cockpit is "migration of historical data". Does this mean that S4HC will no longer be only a green field?	A) Transformation to S/4HANAN Cloud remains a 'green field' approach! The historical data is stored in a separate app on SAP Cloud Platform just for reporting reasons. NO historic data is loaded into S/4HANA Cloud, nor into any S/4HANA Cloud related application tables.
Q) Is there a maximum number of line items for migration like for openpoint customers?	A) For the file-based data migration the only technical limitation is the maximum row count in Microsoft Excel (currently 1 million).
Q) It is possible to modify the migration templates with custom fields in the migration cockpit for S/4HANA Cloud?	A) Fields that are added via In-App Extensibility will show up on the migration template automatically, if the respective API is supporting this. Currently this is only true for the migration object 'CPM Projects'.
Q) How was the predictive model improved?	<p>A) The prediction model was optimized from following perspectives:</p> <ol style="list-style-type: none"> 1, The performance during the training phase with big data. 2, the performance during the consumption phase with big data. (mean running the application) 3, the accuracy of the model was optimized, where new data in current month will be considered as one of the influence. <p>If you want to know more about the model and application, You are welcome, to reach out to us via the Cross Topics Forum</p>
