

## SAP S/4HANA Cloud 1902 Show & Tell – Sourcing & Procurement

Follow up on open questions

Submitted Questions	Answer
<p><b>Why needs to use the product version to trigger the BOM in the subcon PO if we only have one BOM?</b></p> <p><b>If there is only one BOM, why it requires the production version to trigger the component?</b></p>	<p>The subcontracting demo which I have shown, single BOM is exploded and raw materials are external procurement without product version.</p>
<p><b>Do we have an App for Service Entry Sheets processing in this release?</b></p>	<p>In 1808 We have released the “Manage Service Entry Sheets - Lean Services” app.</p> <p>Check out the <a href="#">1902 Services Show &amp; Tell Show &amp; Tell</a></p>
<p><b>Will we able to see the old and new change in purchasing documents</b></p>	<p>The information is basically fetched from history table. it contains old and new changes.</p>
<p><b>will mass uploading of invoices be available for opentext OCR this year?</b></p>	<p>The topic is in the backlog and currently discussed and No release date available</p>
<p><b>Are the approval workflows on same technical architecture as previous ECC6? (SWFO)</b></p>	<p>ECC6 has a release strategy and but with S/4HANA we have new flexible workflows for approval process.</p>
<p><b>Is recursive material supported in subcontracting (serialization)?</b></p>	<p>Yes subcontracting supports both serialization and non-serialization</p>
<p><b>Will S/4 support IDOC in the same system between two plants?</b></p>	<p>In S/4HANA IDOC is supported between two plants. This is more generic questions, it also depends on situation to situation.</p>
